

Mitesh Vasoya

Backend Development • Distributed Systems • Payment Systems • Database Optimization • Microservices Architecture
Ahmedabad, India | +91 7096141814 | mrvasoya2001@gmail.com | github.com/miteshrvasoya | linkedin.com/in/mitesh-vasoya

PROFESSIONAL SUMMARY

Backend Engineer with 2.7 years of experience building **reliable backend systems for fintech applications**. Experienced in **payment gateway integrations (Cashfree, Paytm, Easebuzz), payout systems, and designing idempotent, fault-tolerant APIs**. Strong in Node.js, PostgreSQL, MongoDB, and distributed system design.

EXPERIENCE

eVitalRx

Backend Engineer

Aug 2023 – Present

Ahmedabad, India

- Designed and implemented payout and transaction **systems handling Rs.4Cr+ total disbursements, supporting Rs.8Mn monthly partner settlements** with strong focus on **idempotency, validation, and failure handling**.
- Integrated multiple payment gateways including **Cashfree, Paytm, Easebuzz, and PhonePe for payment collection and vendor payouts**.
- Built idempotent APIs and webhook handling systems ensuring reliable transaction processing and prevention of duplicate payouts.
- Designed validation and reconciliation flows to ensure consistency between transactions, payouts, and ledger records.
- Designed queue-based payout execution flow (Redis/BullMQ) for reliable, retryable, and fault-tolerant payment processing.

DUIUX Infotech

Junior Web Developer (MERN Stack)

Dec 2022 – Aug 2023

Surat, India

- Built REST APIs and business workflows powering scalable e-commerce and booking platforms.
- Built real-time features using **Socket.IO**.

PROJECTS

MailOS — AI-based email processing system

Live URL

- Built an AI-driven backend system processing 100–300 emails/user/day for classification, prioritization, and structured digest generation, reducing inbox noise by 80%.
- Designed scalable pipelines for email intelligence and task extraction with <3s processing latency.

Tryk — AI Powered Customer Support Platform

Live URL

- Developing an AI-powered support automation platform enabling businesses to deploy conversational assistants.
- Designed **multi-tenant backend architecture and knowledge ingestion pipelines** enabling scalable query routing and response generation.
- Explored payment routing strategies for selecting optimal gateways based on latency and success rates.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, Python

Backend Engineering: Node.js, Express.js, REST API Development, API Design, Microservices Architecture

Databases: PostgreSQL, MongoDB, MySQL, Query Optimization, Database Performance Tuning

Infrastructure: Redis, Queue Systems (BullMQ), Distributed Systems, Asynchronous Processing, Caching

Payments: Payment Gateway Integration, Webhook Handling, Idempotent APIs, Transaction Processing

Observability: Sentry, Logging, Monitoring, Error Tracking

Tools: Git, Postman, Jira

EDUCATION

Gujarat Technological University

Bachelor of Engineering in Computer Engineering (CGPA: 8.38 / 10)

2019 – 2023

Surat, India
